Manufacturing Products

HT/LT overhead line materials

For over three decades, JTS has been at the forefront of the design, manufacturing, and supply of an extensive array of High-Tension (HT) and Low-Tension (LT) overhead line materials. As a trusted industry leader, we have established a strong presence in the supply of Air-break switches and associated materials to the electricity distribution companies of Telangana and Andhra Pradesh.

Our commitment to excellence is exemplified by our comprehensive in-house supervision of every aspect, from the initial design stage to the final construction process, all executed at our manufacturing facilities situated in Hyderabad. At JTS, we take immense pride in delivering products of the highest quality, bearing the coveted CPRI (Central Power Research Institute) certification.
